

Taylor Technical Publications & Consultants

*Helping steel fabricators comply with the
AISC Standard for Certification of Steel Building Structures*

You may choose to have one of our Certification & Compliance Specialists work with you to complete any or all of the following:

- Conduct a GAP analysis of your documentation to the standard.
- Bring your quality manual and procedures into compliance.
- Conduct a pre-audit assessment to prepare your shop.
- Provide assistance during your formal audit.

**Please contact Janette Taylor at 480/423-7072 or
jtaylor@ttpcinc.com**

Staff Engineer

This is an entry-level, full-time position. The employee will assist and report directly to the Chief Engineer to complete all tasks related to the detailing, design, manufacturing, and field modifications of steel joists and joist-girders. Requires Bachelor's Degree in Civil Engineering, primary study in Structural Engineering and passed Engineer-in-Training (Fundamentals) Exam. Working knowledge of Microsoft Word and Excel and AutoCAD. Knowledge of MathCAD a plus. Must be willing to work in a production atmosphere. Please e-mail resume to Walt Worthley at wworthley@valleyjoist.com.

Steel Solutions Center Advisor

*Creative! Innovative! Helpful! Competent!
Quick! Computer Savvy! Teachable! Aggressive!*

If those words describe you as a structural engineer then the AISC Steel Solutions Center is the next step in advancing your career. As a result of an internal promotion, we have an opening for a solutions advisor in our Chicago headquarters. You will work with design and construction industry professionals in identifying and proposing innovative steel solutions for real world projects. Using your technical design experience and skills you will create conceptual solutions and identify ways of lowering costs and accelerating project schedules. This is not a job for the timid engineer who is comfortable spending months on a single project. In the Steel Solutions Center you will regularly be exposed to dozens of projects and develop professional contacts with industry leaders. The opportunity is yours to grow your competency in systems like Girder-Slab™, staggered truss, castellated beams, steel plate shear walls, seismic systems, mixed use structures, fire codes and fire protection systems while utilizing the newest releases of design and fabrication industry software.

AISC is a great working environment offering flexibility, professional development opportunities, excellent resources and a competitive salary with an excellent benefit package. You've always said "wouldn't it be great to work at an organization like AISC?", so if you are a graduate structural engineer with a minimum of 3 years of design experience send us your resume by e-mail today!

AutoSD Steel Detailing

AutoSD Steel Detailing is a program written to run inside AutoCAD 13-2002, LT 2000-2002 and IntelliCAD 98-2001 for detailing structural and miscellaneous steel, erection drawings, roof frames, embedded items and general editing, beams, columns, bracing, stairs, stair rails, wall rails, ramp rails, ladders and hip and valley.

Automatic detailing is done with a minimum of input. You configure the program to your detailing requirements. It has Beam to Beam, Beam to Column and Vertical brace to Column connection matching. Carry through piece marks. Import dxf files created by SDS/2, Xsteel, Steelcad and CVSpro for editing. Extract shop bill information for import into material manager program by E. J. E. Industries and FabTrol. Backed by a 45 day money back guarantee, no maintenance fees and free telephone support to ensure your satisfaction.

AutoSD, Inc., 8203 Lizelia Rd, Meridian, MS 39305, Voice/Fax (601) 679-5800

Marketing Manager for AISC Certification Needed in Chicago

Are you an extroverted, structural engineer who is tired of crunching numbers at your desk? If so, AISC is looking for you! Help us communicate the important role quality plays in completing a project on time and under budget. Your engineering background will help you speak the language of other specifying engineers while interacting with world leaders in the design and construction industry. You'll need excellent promotional skills, tenacity, passion, at least four years of experience, and an appreciation of the unique role of each individual on the design-construction team. AISC provides the resources, a competitive salary, and excellent health and retirement benefits.

ALLOW GLOBAL STEEL FABRICATORS, INC. TO HELP YOU BY TURNING BACK THE CLOCK ON STRUCTURAL STEEL PRICES.

Given current domestic steel pricing and limited supply, fabricators today are struggling to complete their backlog at contracted prices and many are subsequently being driven into the red.

Let Global Steel Fabricators, Inc. provide you with an alternative to massive losses and help you fulfill your obligations to your customers. GSF can offer you a solution by fabricating your structural steel order overseas. We will source the raw material at true world-market prices--not at inflated domestic prices--and we will fabricate your order to ASTM and AWS specifications in ISO-certified facilities.

With savings of 20% or more, we can help you AVOID THE RED INK AND STOP THE HEMMORAGING without sacrificing quality. Conscious of today's market realities, owners are more willing than ever to look at offshore fabrication.

We are currently looking for projects that are at the shop drawing stage covering RAILING, PLATE FABRICATIONS, and CASTINGS.

Please see our website: www.gsfsteel.com for more information or e-mail us at sales@gsfsteel.com. Allow us to use our world-wide resources to enhance your bottom line.
