

Regional Engineer—Northeast

Have you ever thought about utilizing your structural engineering background and knowledge in a different way? **RAM International**, a leading structural engineering software company, is looking for a self-motivated and dynamic structural engineer to join our sales staff of Regional Engineers. Job location: Northeast United States.

Qualified candidates for this position will have:

- A bachelor's or advanced degree in structural engineering
- 3+ years of practical design experience in any type of structural design
- Professional Engineer's registration
- Extensive experience with engineering software products in general and RA International software products in particular
- Experience with AutoCAD is not required but is desirable
- Sales experience is not required—extensive sales training will be provided
- An aptitude for excellent customer service and attention to detail
- Excellent written, verbal, and interpersonal communications skills
- Extensive travel required

This is a highly responsible and largely independent position. If you are interested in joining our team and you meet the qualifications above, please send us your resume to gus@ramint.com. See our web site at www.ramint.com.

RAM International provides a full benefits package including health plan, tuition reimbursement and 401K.

Taylor Technical Publications & Consultants

Helping steel fabricators comply with the
AISC Standard for Certification of Steel Building Structures

You may choose to have one of our Certification & Compliance Specialists work with you to complete any or all of the following:

- Conduct a GAP analysis of your documentation to the standard.
- Bring your quality manual and procedures into compliance.
- Conduct a pre-audit assessment to prepare your shop.
- Provide assistance during your formal audit.

Marketing Manager, AISC Certification

Are you an extroverted structural engineer who is tired of sitting at your desk and crunching numbers? Do you look forward to a phone call from the General Contractor simply because you love talking to people? Do you have a passion for assisting engineers, architects, owners and contractors in their use of structural steel? If so, the American Institute of Steel Construction is looking for you! We are looking for someone who knows how important quality is in completing a project on time and under budget—and can't wait to tell everyone all about it. Your technical and design background in structural engineering will help you speak the language of other specifying engineers. And you will have the opportunity of a lifetime to interact with world leaders in the design and construction industry.

It won't be easy...you need excellent promotional skills, public speaking ability, creativity, an appreciation of the unique role of each individual on the design-construction team, and DRIVE. Couple those with at least four years of experience in structural engineering or architecture and you'll find yourself in a position that is the perfect fit for your skills and talents.

The position is located in our headquarters in Chicago. AISC provides the resources and a competitive salary with excellent health and retirement benefits. You provide the passion!
