Nesting Software

The **Optimal Cutting Program (OCP)** by SoftLOGIX for nesting (Muling) linear material can use on-hand material and provide a list of material to be ordered in stock lengths. Piece mark, length and quantity to be cut from each ordered or on-hand material is indicated.

OCP requires no set up and is immediately useable. Configurable units for Feet-inches, Millimeters and Decimals. OCP can accept data from a KISS file, a SteelLOGIC file or manual entry. Only \$279.95 for manual entry and \$349.95 for the KISS version.

To download a free trial version go to www.SoftLogix.com.

Are you thinking of becoming AISC Certified?

Quality Management Company can help!

Writing your own Quality Manual may be easier than you think. QMC Online (www.qmconline.com) has a multitude of free resources that can save you time and money preparing your documentation required for AISC Certification. At QMC Online, you'll find:

- A downloadable sample quality manual geared to both large and small fabricators, that includes instructive comments from QMC
- Sample procedures with guidance on how to write them effectively
- Required references that meet current codes and standards for your library
- Answers to over 100 frequently asked questions
- Samples of internal audits and more

Make QMC Online your first stop when considering AISC Certification, or call 312.670.7520.

Detailers & Checkers

Are you interested in working on the largest industrial and commercial steel projects in the country? Due to the tremendous continued growth of our company, Merrill Iron & Steel, Inc., needs to expand our group of highly motivated, quality driven Steel Detailers and Checkers. If you are looking to be part of a fun, flexible working environment and earn up to \$65,000+ per year, depending on experience, this opportunity is for you.

We work on a variety of projects, from large industrial ductwork and structural steel, to sports complexes and high-rise buildings. Our group of Detailers and Checkers are well trained and motivated to provide the highest quality drawings. Opportunities to advance are available and encouraged and we promote from within. We offer a flexible work schedule, excellent benefits with the Company paying over 85% of the premium cost for health and dental insurances. Also included are 401(k) with company match, paid holidays and vacation time. You will also enjoy excellent job security with our company – we have been in business for 44 years.

We are looking for meticulous, detailed oriented individuals in the steel detailing industry, who enjoy working with others on challenging projects. We prefer applicants with technical training in structural steel with related job experience. Experience in industrial, structural, and ductwork detailing and checking, as well as SDS/2, are tremendous assets. Please forward this ad to other appropriate friends and colleagues that may be interested. We keep all inquires confidential, so please apply.

Applications can be sent, for your convenience, by fax to (715)-355-0495, email to jobs@merrilliron.com, or mail to:

Software Sales Manager

The story of FabTrol Systems, Inc is about people who share close ties to our steel fabricators clients with a shared purpose of improving their business systems. Our focus for the past 25 years has been to produce the best steel fabrication management software embodying best practices in every aspect of management. With integrity, social responsibility, and new ideas, we make things happen. We take pride in what we accomplish together. Yet there is always more to learn, new relationships to form, and more opportunities for innovation.

You can make a tangible difference working with a team providing products and services to our valued customers. The ideal candidate is a dynamic, analytical, technically-oriented leader with 2+ years experience in construction, structural steel, engineering, or custom machinery, 7+years professional experience and a Bachelor's degree.

Please see www.fabtrol.com for a complete job description and to apply for this exciting position. Direct questions to recruitcolleen@yahoo.com.

Steel Solutions Center Advisor

Creative! Helpful! Competent! Quick! Computer Savvy! Aggressive!

If those words describe you as a structural engineer, then the **AISC Steel Solutions Center** is the next step in advancing your career. We currently have an opening for a Solutions Advisor. You will work with design and construction industry professionals in identifying and proposing innovative steel solutions for real world projects. Using your technical design experience and skills you will create conceptual solutions and identify ways of lowering costs and accelerating project schedules. In the Steel Solutions Center you will regularly be exposed to dozens of projects and develop professional contacts with industry leaders.

The **Steel Solutions Center** is looking for a graduate structural engineer with a minimum of three years of design experience. AISC is a great working environment offering professional development opportunities, flexibility, excellent resources and a competitive salary with an excellent benefit package.

Send resumes to Jason Ericksen at ericksen@aisc.org.

Regional Engineer – Pacific Northwest

Are you an engineering professional looking for a new challenge that is different and exciting? Are you good at promotion, overcoming roadblocks, working with diverse teams, juggling multiple tasks and managing numerous high level relationships? Are you ready to take the lead in growing the construction market in the Pacific Northwest for structural steel?

The **American Institute of Steel Construction, Inc.**, founded in 1921 as the trade association for the structural steel industry, is looking for the right person to take the lead in promoting the use of structural steel in Washington, Oregon, Northern California, Idaho, Montana and Alaska. Your success will depend on your ability in developing and maintaining relationships with key influencers, pursuing and influencing projects, working with owners and architects, making presentations, conducting seminars, assisting structural steel fabricators with promotional and business development programs and serving on key industry committees. The ideal candidate will be a civil or structural engineer with a minimum of five years experience in building design, construction and/or fabrication and a passion for consultative marketing. Strong communication and computer skills are a must.

To submit your resume for consideration and request a full description of this position, please contact John Cross, Vice President, AISC Marketing LLC at cross@aisc.org. e/o/e
